

# Transfer Google Drive Files Ownership Between Users

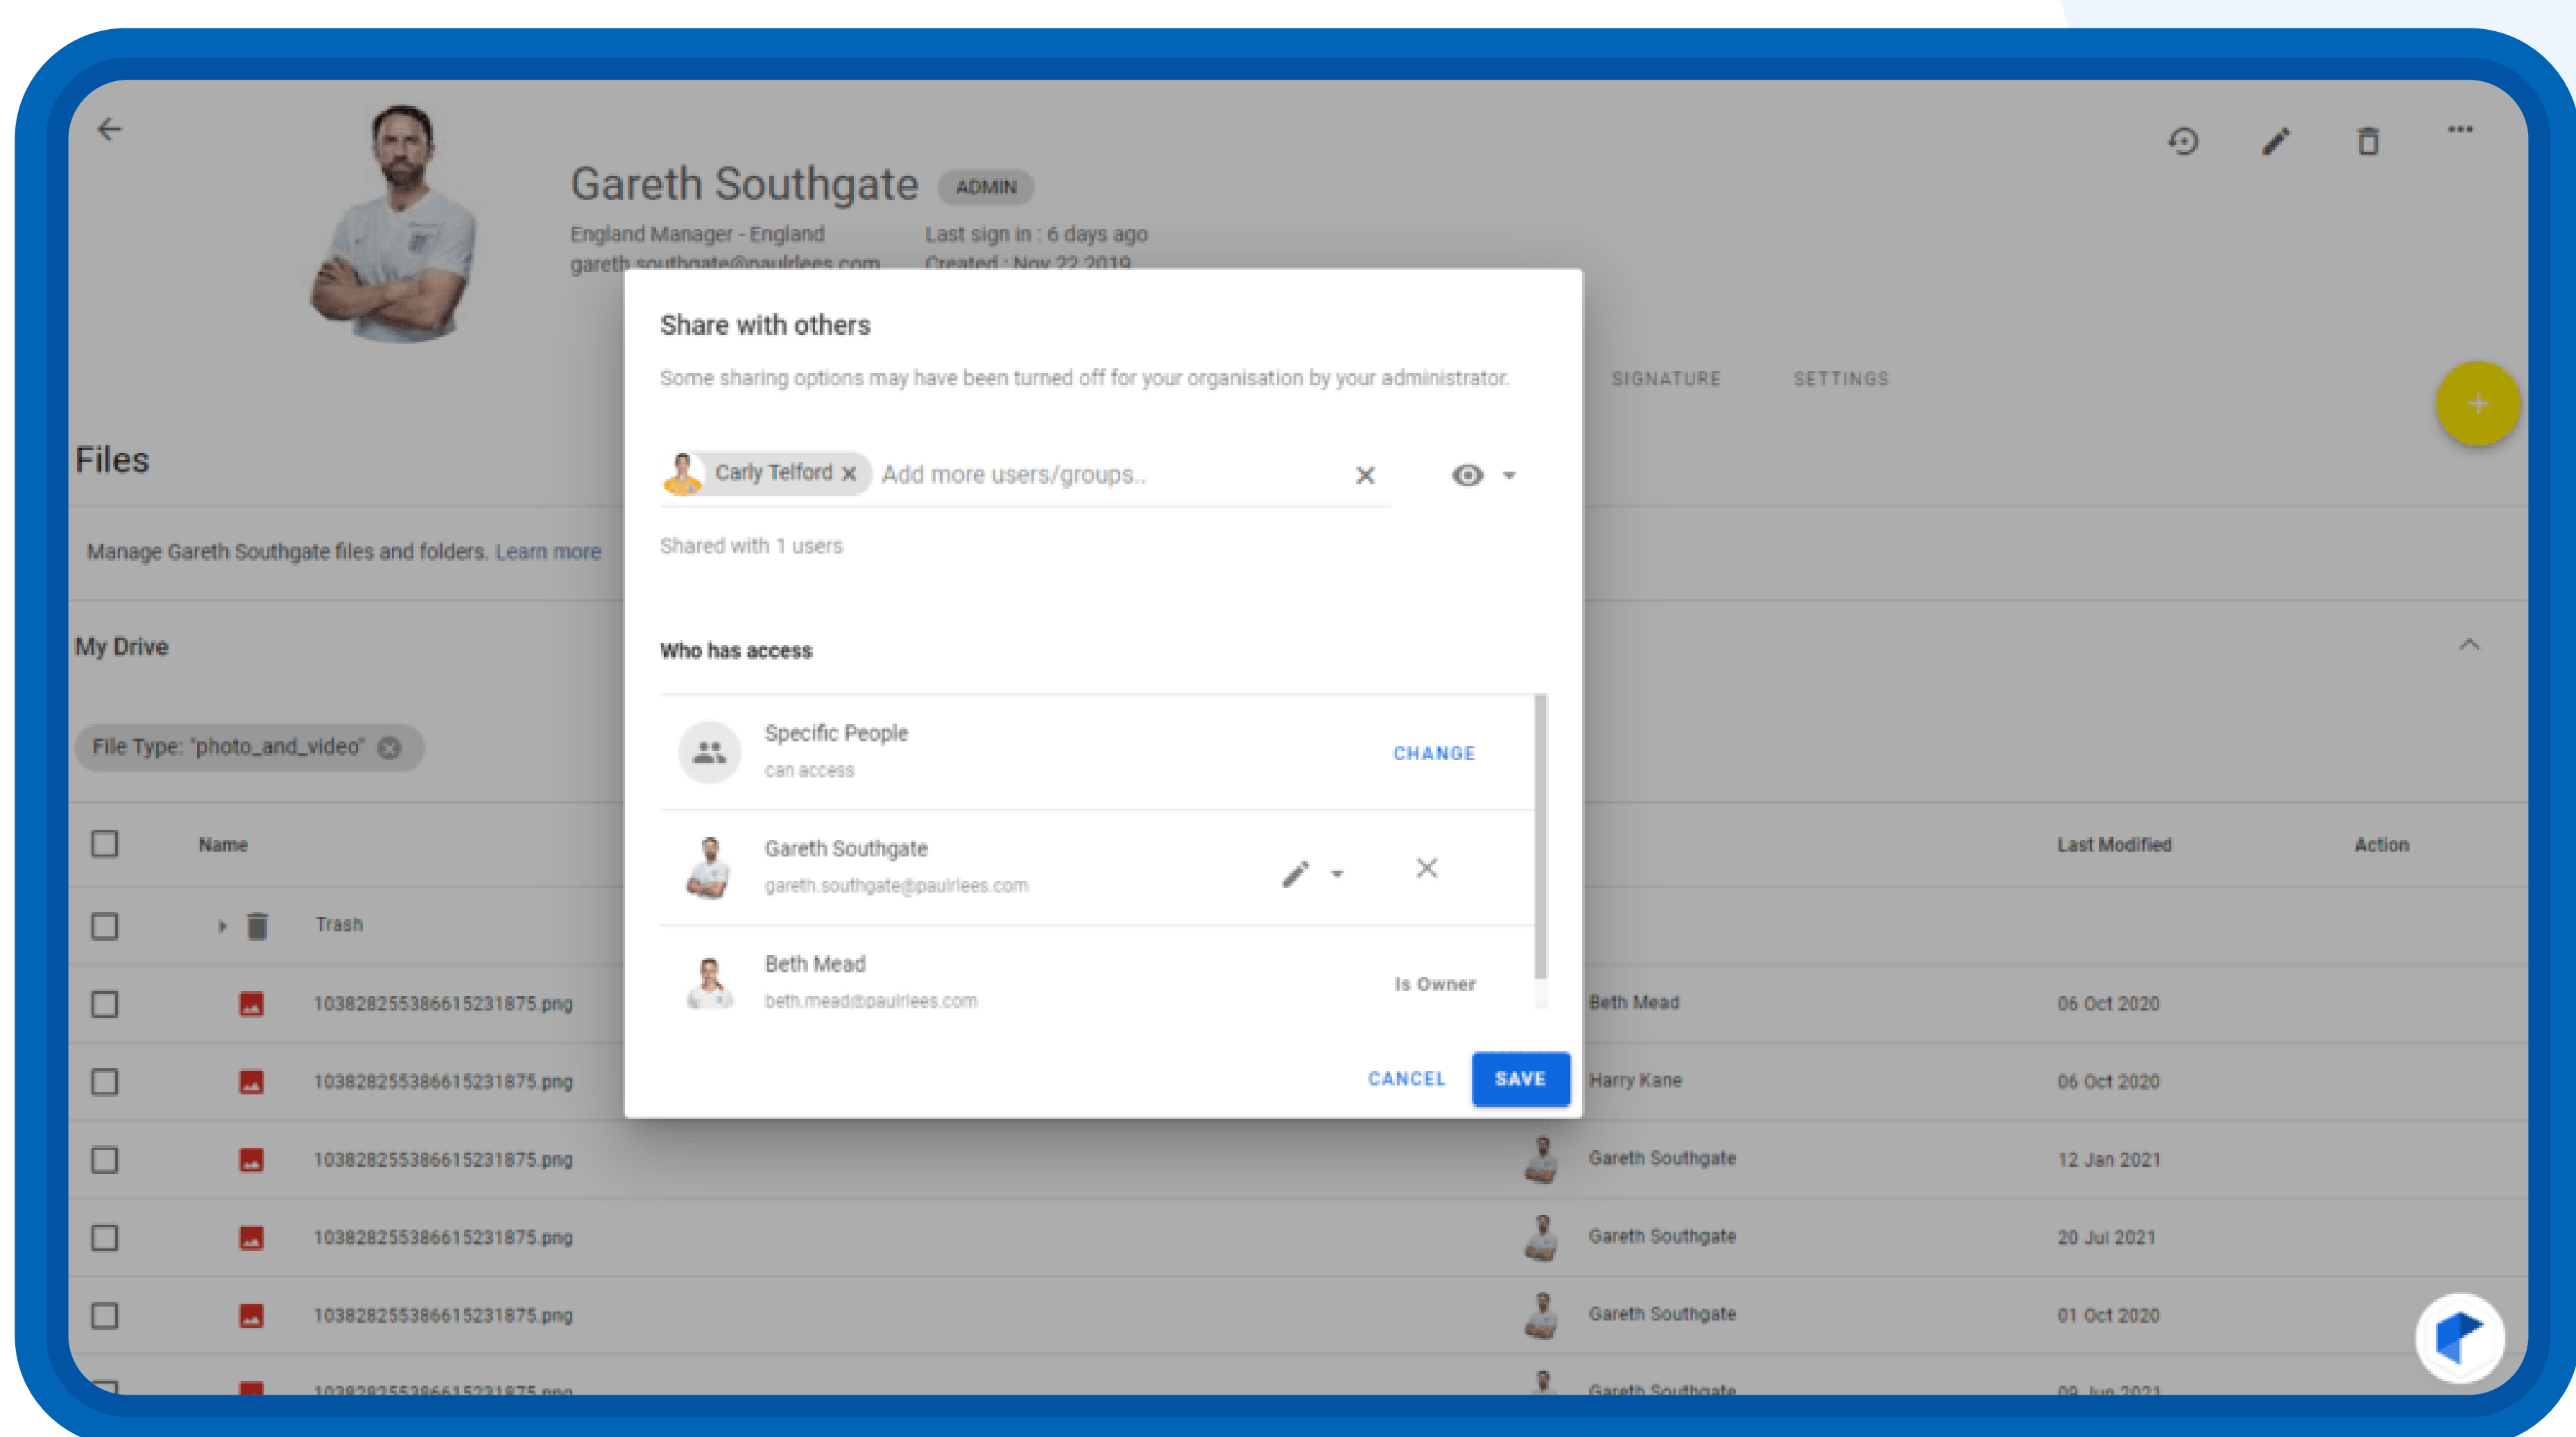

It's sometimes necessary to transfer file ownership in Google Drive from one user to another.

## Transfer Ownership with Patronum

Within Patronum you can transfer ownership of Google Drive files from one Google Workspace user to another, and unlike the Google Workspace Admin Console, you don't need to transfer all files. Patronum allows you to select specific files to be transferred.

## Share Google Drive Files with others

Patronum has you covered, just search for the file, select Share and you can view, edit and add additional collaborators to the file, making it easy for users to continue working when colleagues are not available or are on vacation.

## Search Google Drive Files

If you know the name or even better the file Id of the Google Drive file you can use Patronum's powerful Google Drive Search feature. With DRIVE SEARCH you can locate files across all users and Shared Google Drives within seconds.
